Daily Scrum Meeting #3 – October 12, 2026

Project: Clinic Appointment System
Meeting Type: Daily Scrum #3
Duration: 15:33 minutes
Platform: Google Meet

Attended by:

Name	Role
Mineh Jami	Scrum Master
Sewara Rashidi	Team Developer
Sonbol Almas	Team Developer
Husna Zala Khan	Product Owner

Meeting subject:

The purpose of the meeting was to share the progress made by the team yesterday, on day 2 of the sprint. We also planned to discuss the steps on how to proceed next. The objective is to make a dent in the workload by the next day.

Meeting Summary:

Mineh Jami (Scrum master): Introduced the meeting, listened to the team members explaining their progress. inquired about problems and blockers. Shared the sprint backlog to update the tasks' status, announced the date for the sprint review and retrospective meeting, and clarified the expectations for the next day.

Sewara Rashidi(Team developer): Explained her registration backend planning including server-side validation, password hashing, duplicate-email prevention, "patient" role assignment, user "pending" status. She also shared an early demo of the increment, demonstrated password validation in the project, and demonstrated the rejection of duplicate emails in the users database.

Sonbol Almas(Team developer): explained her completed tasks including implementing the complete UI of the patient registration, pushing the finished page onto GitHub, as well as implementing and testing client-side JavaScript validation.

Key Points of the meeting:

- The first demonstration of the project
- The backend registration database was set up fully.
- Validation both in the server-side and client-side was set up.

- An early version of user role assignment was established.
- Test documentation related to all the completed tasks was uploaded.
- Registration page UI designed.

Notes:

Product owner’s presence in the meeting was not official and it was only for learning purposes.
