**Product Owner: Husna Zala Khan**

**Scrum Master: Mineh Jami**

**Developers: Sonbol Almas, Sewara Rashidi**

**Project: Clinic Appointment Management System**

**Sprint: Sprint 4 (Oct 27-29, 2026)**

---

## Sprint Goal:

To enhance the clinic appointment management system by enabling patients to cancel and reschedule appointments, view their appointment history, and receive timely appointment reminders, while allowing doctors to manage and update their professional profiles accurately.

---

## User Stories:

| ID | User Story | Story Notes | Status |
|---|---|---|---|
| **US-09** | Appointment Cancellation | As a patient, I want to cancel my appointment so that I can inform the clinic when I can no longer attend. | Done |
| **US-10** | Appointment Rescheduling | As a patient, I want to reschedule my appointment so that I can choose another available time when my plans change | Done |
| **US-12** | Appointment History | As a patient, I want to view my upcoming and previous appointments so that I can keep track of my appointments. | Done |
| **US-13** | Appointment Notifications/Re minders | As a patient, I want to receive appointment reminders so that I do not forget my | Done |

| | | | |
|---|---|---|---|
| | | scheduled appointment. | |
| **US-14** | Doctor profile management | As a doctor, I want to manage my professional profile so that patients can see accurate information about me. | Done |

---

## Acceptance Criteria:

US-09: Appointment cancellation

1. Patient can view eligible appointments for cancellation.
2. Patient can select an appointment to cancel.
3. System updates the appointment status after cancellation.

US-10: Appointment Rescheduling

1. Patient can select an existing appointment to reschedule.
2. System displays available alternative slots.
3. System updates the appointment after a new slot is selected.

US-12: Appointment History

1. Patient can view upcoming appointments.
2. Patient can view previous appointments.
3. Appointment details are displayed accurately.

US-13: Appointment Notifications/Reminder

1. System identifies upcoming appointments.
2. System sends a reminder for an upcoming appointment according to the configured schedule.
3. Reminder contains the relevant appointment details.

US-14: Doctor Profile Management

1. Doctor can view their professional profile.
2. Doctor can update permitted professional information.
3. System saves the updated information.

## Sprint Tasks

| Task ID | Task description | User Story | Status |
|---|---|---|---|
| **T9.1** | Develop functionality for patients to view eligible appointments and select one for cancellation. | US-09 | Done |
| **T9.2** | Implement appointment cancellation and update its status in the database. | US-09 | Done |
| **T9.3** | Test appointment cancellation and status updates. | US-09 | Done |
| **T10.1** | Implement functionality for patients to select an existing appointment for rescheduling. | US-10 | Done |
| **T10.2** | Retrieve and display available alternative appointment slots. | US-10 | Done |
| **T10.3** | Implement rescheduling and update the appointment with the selected slot. | US-10 | Done |
| **T10.4** | Test appointment rescheduling and slot availability. | US-10 | Done |
| **T12.1** | Develop the patient appointment history interface. | US-12 | Done |
| **T12.2** | Implement retrieval and display of upcoming and previous appointments with accurate details. | US-12 | Done |
| **T12.3** | Test appointment history retrieval and display. | US-12 | Done |
| **T13.1** | Implement functionality to identify upcoming appointments according to the configured reminder schedule. | US-13 | Done |
| **T13.2** | Implement reminder generation and delivery, including relevant appointment details. | US-13 | Done |
| **T13.3** | Test reminder scheduling, delivery, and accuracy. | US-13 | Done |
| **T14.1** | Develop the doctor profile interface to view and update professional information. | US-14 | Done |
| **T14.2** | Implement validation and database saving of permitted profile updates. | US-14 | Done |

| | | | |
|---|---|---|---|
| **T14.3** | Test profile viewing, editing, and data persistence. | US-14 | Done |

---

## Definition of Done:

A user story can be considered Done when:

- All its acceptance criteria are satisfied.
- The implementation is integrated into the working product.
- Relevant tests pass.
- No unresolved critical defects prevent the functionality from being used.
- Security requirements relevant to the functionality are satisfied.
- The completed work meets the team's agreed quality standards.

---

## Sprint Metrics:

| Metric | Target | Actual | Status |
|---|---|---|---|
| **User stories completed** | 5 selected user stories | 5 completed stories | Done |
| **Bugs Found** | Track all identified bugs | All bugs were identified | Done |
| **Bugs Fixed** | Fix relevant defects identified during the Sprint | All identified bugs were fixed | Done |
| **Required Tests** | All required tests should pass | The tests performed passed | Done |
| **Sprint Goal Met** | Achieve the Sprint Goal | Sprint goal was met | Done |

---

## Increment/Sprint Outcome:

**Working functionality delivered:**
Patient appointment cancellation and rescheduling, appointment history viewing, automated appointment reminder generation and delivery, and doctor professional profile viewing and updating.

**Overall outcome:** This sprint improved appointment management by giving patients greater flexibility and control over their appointments while ensuring they receive timely reminders and can track their appointment history. It also enabled doctors to maintain accurate professional profiles, contributing to a more organized, reliable, and user-friendly clinic appointment management system.

---

## Testing and quality summary:

Testing was conducted to verify that patients can view and update their profiles, appointment slots cannot be double-booked, confirmations are generated and displayed correctly, and doctors can manage their schedules according to their permissions. Validation, data persistence, access control, and schedule updates was also checked to ensure the system functions reliably and meets the user story acceptance criteria.

---

## Stakeholder Feedback:

None was recorded.

---

## Issues and Blockers:

**No specific issues were identified.**

---

## Product Backlog Updates:

No updates or refinements to the original document were made, but some clarification and confirmations were made by the product owner during a meeting together with one of the team developers. The details of which could be found in the “Discussion questions” folder of the repository.

## Sprint Retrospective — Improvement Action:

**Improvement identified:**

- Styling could be more uniform
- Merging conflicts could improve
- Keeping priorities straight

**Action for the next Sprint:**

- Using one BootStrap and CSS style across the new staff pages.
- Keeping the navigation consistent.
- Review the changed files before merging.
- Build high priority user stories first and avoid making risky changes.
