Sprint 5 Review meeting – November 1, 2026

Project: Clinic Appointment System
Meeting Type: Sprint Review
Duration: 16:45 minutes
Platform: Google Meet

Attended by:

Name	Role
Mineh Jami	Scrum Master
Sewara Rashidi	Team Developer
Sonbol Almas	Team Developer
Husna Zala Khan	Product Owner

Meeting subject:

The purpose of the meeting was to review the final increment and have the product owner judge it based on the acceptance criteria. Additionally, the stakeholder feedback will be reviewed, and testing data will be presented.

Meeting Summary:

Mineh Jami (Scrum master): Introduced the meeting, welcomed the participants, reiterated the Sprint Goal and confirmed that November 1 is the final day of the project development, explained the documentation of the Sprint Goal, the finished tasks and the blockers taking place during the sprint. Additionally, she judged the items demonstrated and made suggestions.

Sewara Rashidi(Team developer): Sewara began the Sprint 5 demonstration by explaining that the sprint focused on completing the remaining clinic administration functionality across four user stories: US-17, US-18, US-19, and US-20. She clarified that her main responsibility was backend development, while Sonbol primarily contributed to the frontend and interface integration.

She first demonstrated US-17: Patient Information Management by logging into the system as an authorized receptionist and opening the Patient Management page. She showed how receptionists could view registered patient records, select a patient, and edit permitted personal and contact information, including name, age, phone number, email, and address. She explained that sensitive medical information, such as medical history, diagnoses, and treatments, was restricted based on the product owner's clarification. She demonstrated saving an updated patient record and confirmed that the changes remained

saved even after refreshing the page and reopening the record. She also mentioned that unauthorized access and invalid requests were tested, with 14 test cases documented as passing.

Next, she demonstrated US-18: Doctor Information Management, showing how authorized staff could access the Doctor Management page, view registered doctors, select a doctor's record, and access the editing interface to manage doctor information.

For US-19: Appointment Management, Sewara demonstrated the staff appointment management page, which provided an overview of existing appointments and their scheduling information. She explained that, following the product owner's clarification, receptionists and administrators were permitted to manage appointments on behalf of patients. This included booking, cancellation, and rescheduling. She demonstrated the booking process, where staff could select a patient, doctor, appointment date, and available time slot.

Finally, she demonstrated US-20: Clinic Information Management. She explained that this feature allowed authorized staff to maintain important clinic details, including the clinic name, address, contact number, and opening hours. She showed the clinic management interface and demonstrated editing and saving the clinic name. After refreshing the page, she confirmed that the updated information remained displayed, demonstrating successful database integration and data persistence. She also clarified that the clinic information used during the demonstration was fictional and could be replaced with actual details later.

Husna Zala Khan(Product Owner): Acceptance criteria were evaluated and confirmed by Husna though a comprehensive checklist. She also expressed her satisfaction with the work the team had completed this sprint and deemed the final increment to be perfect.

Key Points of the meeting:

- Sprint Goal and objective was met.
- Demonstration of the working features was successful.
- Final Increment was approved by the product owner.
- No unfinished tasks remained at the end of the sprint.
- Testing results completed.
