Sprint 2 Retrospective meeting – October 21, 2026

Project: Clinic Appointment System
Meeting Type: Sprint Retrospective
Duration: 17:00 minutes
Platform: Google Meet

Attended by:

Name	Role
Mineh Jami	Scrum Master
Sewara Rashidi	Team Developer
Sonbol Almas	Team Developer
Husna Zala Khan	Product Owner

Meeting subject:

The purpose of the meeting was to discuss the final increment, what went well during the development of it, what challenges were faced and what improvements should be considered when starting Sprint 2.

Meeting Summary:

Mineh Jami (Scrum master): Introduced the meeting, shared the objective of the meeting, asked the participants to share what they think went well, their challenges and the potential improvements they have thought of. Additionally, she shared that she was satisfied with the collaboration between members, and suggested an improvement on gathering feedback from other people during development. She was also responsible for closing the meeting and explaining the next meeting's details.

Sewara Rashidi(Team developer): She stated that she was happy with the productivity of this sprint, and she liked that they had already planned everything before the sprint had started. She also thought that working on GitHub went really well this sprint, and both the developers were able to merge their work together successfully. She shared that testing was done along with integration in this sprint which also went really well. She believed that communication had improved in this sprint as well. The challenge she faced was about the updates of the database on both computers being delayed. She also shared that it was challenging to discover new requirements that they hadn't already planned for during development such as doctor availability updates needing more protection to consider already confirmed appointments.

Husna Zala Khan (Product Owner): Shared that she was satisfied with everything. Also, she thought communication between members was really smooth this sprint. She shared all the clarifications with the developers easily and got their opinion on everything right away.

Sonbol Almas(Team developer): She thought that the application became more functional this sprint with the addition of doctor search and booking features. She thought that integration of the front and backend worked really well and her access to sewara's database was direct and she didn't need to create it separately. She also liked how they added appointment filtering by date in the booking page. One challenge for her was making sure that frontend matched backend functionalities. Especially the appointment information needed for booking.

Key Points of the meeting:

- Potential improvements for Sprint 3 were recognized.
- The product owner was made aware of all the issues and blockers during development.
- No errors or blockers will carry on to Sprint 2 or slow the team down.
- The team and product owner are satisfied with the current workflow and results.

Notes:

None
