Sprint 1 — Product Owner Checklist

Registration (US-01)

- [ ] Registration form works.
- [ ] Input validation and error messages work.
- [ ] Accounts are saved in the database.

Login (US-02)

- [ ] Login works with valid credentials.
- [ ] Invalid credentials are handled correctly.
- [ ] Password verification, sessions, and logout work.

Role-Based Access (US-03)

- [ ] Four roles are clarified: Patient, Doctor, Reception, and admin.
- [ ] Users receive the correct permissions.
- [ ] Unauthorized access is restricted.
- [ ] Dashboards are demonstrated.

Testing and Sprint Completion

- [ ] Working features are demonstrated, not just screenshots.
- [ ] Tests pass and critical bugs are addressed.
- [ ] Unfinished tasks and blockers are documented.
- [ ] Sprint goal outcome is recorded.

Retrospective

1. What went well?

The team communicated well, discussed the product backlog, and understood the main project requirements.

2. What went wrong?

Some tasks took longer than expected, and there was confusion about a few requirements, also time management issues.

3. What will the team improve in Sprint 2?

The team will improve communication, clarify requirements, divide tasks fairly, and manage time better.
